ject to restriction or election requirement.
O-948.  Examiner.  approved
J.S.C. § 119(e).

Art Unit: 2742

#### **DETAILED ACTION**

- 1. This Office Action is responsive to the amendment(s) filed on June 16, 1997.
- 2. In view of further analysis and applicant's arguments, the rejection of the claims in the instant application under double patenting based on the broad analysis of *In re Schneller* as set forth in paragraphs 7-10 of the previous Office Action has been withdrawn.

#### **DOUBLE PATENTING BETWEEN APPLICATIONS**

3. Conflicts exist between claims of the following related co-pending applications which includes the present application:

#	Ser. No.	#	Ser. No.	#	Ser. No.

Art Unit: 2742

4. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. The attached Appendix provides clear evidence that such conflicting claims exist between the 329 related co-pending applications identified above. However, an analysis of all claims in the 329 related co-pending applications would be an extreme burden on the Office requiring millions of claim comparisons.

In order to resolve the conflict between applications, applicant is required to either:

- (1) file terminal disclaimers in each of the related 329 applications terminally disclaiming each of the other 329 applications, or;
- (2) provide an affidavit attesting to the fact that all claims in the 329 applications have been reviewed by applicant and that no conflicting claims exists between the applications. Applicant should provide all relevant factual information including the specific steps taken to insure that no conflicting claims exist between the applications, or;
- (3) resolve all conflicts between claims in the above identified 329 applications by identifying how all the claims in the instant application are distinct and separate inventions from all the claims in the above identified 329 applications (note: the five examples in the attached Appendix are merely illustrative of the overall problem. Only correcting the five identified conflicts would not satisfy the requirement).

Failure to comply with the above requirement will result in abandonment of the application.

with the time and resources available.

INFORMATION DISCLOSURE STATEMENTS

Receipt is acknowledged of applicant's Information Disclosure Statements filed on October 10, 1995; December 11, 1995; December 22, 1995; February 6, 1996; April 17, 1996; and April 7, 1997. In view of the unusually large number of references cited in the instant application (approximately 2,200 originally and 645 in the subsequent IDS) and the failure of applicant to point out why such a large number of references is warranted, these references have been considered in accordance with 37 C.F.R. 1.97 and 1.98 to the best ability by the examiner

The foreign language references cited therein where there is no statement of relevance or no translation are not in compliance with 37 C.F.R. 1.98 and have not been considered.

Numerous references listed in the IDS are subsequent to applicant's latest effective filing date of 9/11/87, therefore, the relevancy of these references is unclear. Also cited are numerous references that are apparently unrelated to the subject matter of the instant invention such as: US Patent # 33,189 directed toward a beehive, GB 1565319 directed toward a chemical compound, a cover sheet with only the word "ZING", a computer printout from a library search with the words "LST" on it and a page of business cards including that of co-inventor James Cuddihy, among others. The relevancy of these references cannot be ascertained. Furthermore, there are several database search results listed in foreign languages (such as German) which list only the title and document information; no copy has been provided, therefore, these references have not been considered.

Serial Number: 08/444,758

Art Unit: 2742

## Claim Rejections - 35 USC § 112

Claims 2-26 are rejected under 35 U.S.C. 112, first paragraph, as containing subject 6. matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

#### 37 C.F.R. 1.75(d)(1) requires that:

"the terms and the phrases used in the claims must find clear support or antecedent basis in the description so that the meaning of the terms in the claims may be ascertainable by reference to the description".

The following limitations were not supported by the specification as originally filed:

In claim 2, "scheduling a time for transmitting said programming from each of said plurality of intermediate transmission stations to said at least one subscriber, said scheduled time differing from intermediate station to intermediate station"; and "controlling each of said plurality of intermediate transmission stations to transmit said received and stored programming at said scheduled time for each of said plurality of intermediate transmission stations"

In claim 3, "scheduling one of a channel and a frequency for transmitting said programming from each of said plurality of intermediate transmission stations to said at least one subscriber, said one of said scheduled channel and said scheduled frequency differing from intermediate station to intermediate station"; and "controlling each of said plurality of

Serial Number: 08/444,758

Art Unit: 2742

intermediate transmission stations to transmit said selected and stored programming on said one of said scheduled channel and said scheduled frequency for each of said plurality of intermediate transmission stations".

In claim 4, "scheduling one of a time and a channel and a frequency for transmitting said programming from each of said plurality of intermediate transmission stations to said at least one subscriber, said one of said scheduled time and said scheduled channel and said scheduled frequency differing from intermediate station to intermediate station"; and "controlling each of said plurality of intermediate transmission stations to transmit said received and stored programming at said one of said scheduled time and said scheduled channel and said scheduled frequency for each of said plurality of intermediate transmission stations".

In claim 5, "(1) communication at least a portion of said first signal to a storage location, said a least a portion of said first signal including said at least one identification datum and (2) storing said at least a portion of said first signal and said at least one identification datum"; and "(1) selecting said first signal; (2) selecting a second signal, said selected second signal containing at least a portion of a mass medium programming presentation; (3) modifying at least a portion of said second signal; and (4) transmitting said modified at least a portion of said second signal".

In claim 15, "modifying a second signal at said at least one intermediate transmission station based on at least one of said stored first signal and said stored at least one identification datum".

Serial Number: 08/444,758

Art Unit: 2742

In claim 17, "(a) effecting a transmitter station to modify a signal to operate at said plurality of receiver stations to output part of a mass medium programming presentation; and (b) effecting a first receiver station to modify a signal to operate at a second of said plurality of receiver stations to output part of a mass medium programming presentation"; and "receiving a transmitter control signal which operates in said network to communicate said at least one instruct signal to a transmitter".

Claim 20, "storing and modifying said at least one signal at a first of said plurality of receiver stations based on information contained in said at least one signal"; and "outputting part of a mass medium programming presentation at a second of said plurality of receiver stations based on said stored and modified at least one signal".

Claim 23, "transmitting a first signal to said at least one intermediate transmission station, said first signal containing a data portion and at least one identification datum", "receiving at said at least one intermediate transmission station a second signal containing at least a portion of a mass medium programming presentation"; "(1) communicating at least a portion of said first signal to a storage location, said at least a portion of said first signal including said data portion"; and "(1) selecting said stored data portion; (2) selecting at least a portion of said second signal; (3) modifying said selected at least a portion of said second signal; and (4) transmitting said modified at least a portion of said second signal"

# CLAIM REJECTIONS - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the 7. basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 5-23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cogswell 8. et al. (4,331,974).

Cogswell et al. plainly teach the claimed steps of scheduling and signal processing for communicating programming in a network. Cogswell et al. also teach modifying portions of signals (read as the substitute signals).

## CLAIM REJECTIONS - 35 USC § 103

- 9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 10. The factual inquiries set forth in Graham v. John Deere Co., 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.

Serial Number: 08/444,758

Art Unit: 2742

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

11. Claims 2-4 and 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lambert. (4,724,491).

Lambert plainly teaches the steps of scheduling and signal processing for communicating programming in a network. FIG 1 depicts the claimed intermediate transmission station.

Although Lambert shows only one intermediate station, it would have been plainly obvious even to one of ordinary skill in the art at the time of the invention to duplicate the intermediate stations for multiple effects in order to provide programming for plurality of different areas. One of ordinary skill in the art would have been easily motivated to make such a modification since the intermediate station would each contain the COMPUTER CONTROL MEANS 22 for individually controlling scheduling at each of the intermediate stations.

Art Unit: 2742

## Response to Arguments

Applicant's arguments with respect to claims 2-26 have been considered but are moot in 12. view of the new ground(s) of rejection.

13. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 308-9051, (for formal communications intended for entry)

Or:

(703) 308-5403 (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner 14. should be directed to Harry S. Hong whose telephone number is (703) 306-3040. The examiner can normally be reached on Monday through Friday from 8:30 A.M. to 5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Krista Zele, can be reached on (703) 305-4701. The fax phone number for this Group is (703) 308-5403.

Serial Number: 08/444,758

Art Unit: 2742

A

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [krista.zele@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.

Harry S. Hong
